## Supplementary Figure 1

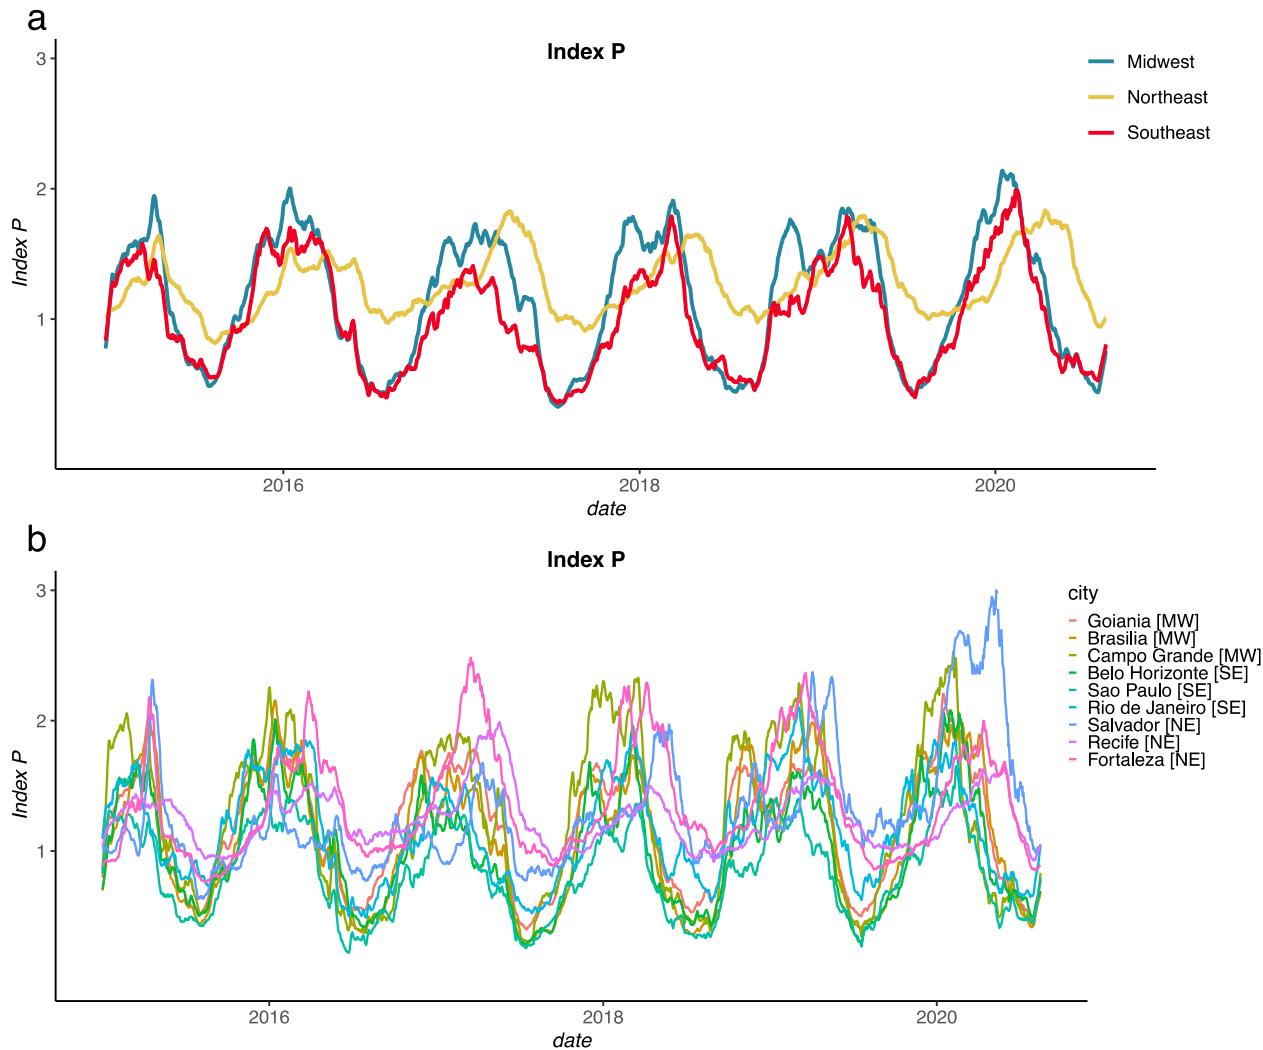

**Supplementary Figure 1. Patterns of serotype dominance 2015-2020.** Map of Brazil showing the progression of serotypes in the three geographic regions sampled in this study - Midwest (MW), Northeast (NE), and Southeast (SE) - between 2015 and 2020 (until EW06). Brazilian macro regions are coloured according to the dominant serotype. Grey represents northern and southern Brazilian macro regions. The initial map of Brazilian regions was obtained from the R package “get\_brmap” (available at: [https://rdrr.io/cran/brazilmaps/man/get\\_brmap.html](https://rdrr.io/cran/brazilmaps/man/get_brmap.html)). Source data are provided as a Source Data file.

## Supplementary Figure 2

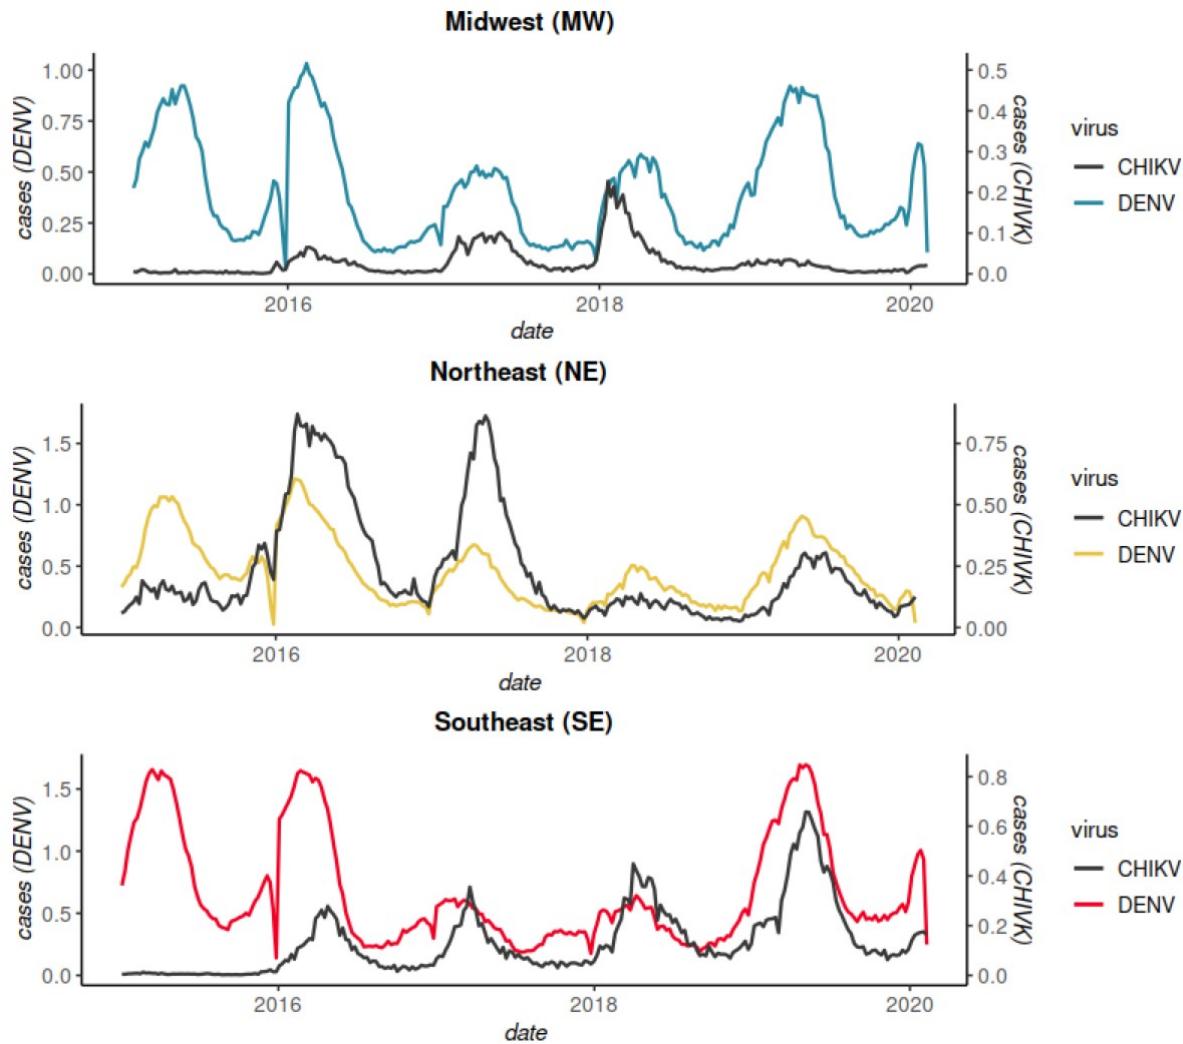

**Supplementary Figure 2. Maps of yearly incidence of dengue in Brazil, 2015-2020.** Maps of Brazil divided by regions (SE=Southeast, NE=Northeast, MW=Midwest) showing the yearly incidence of dengue between 2015 and 2020 (until EW06). Incidence = cases per 100,000 inhabitants per year. Grey represents northern and southern Brazilian macro regions. The initial map of Brazilian regions was obtained from the R package “get\_brmap” (available at: [https://rdrr.io/cran/brazilmaps/man/get\\_brmap.html](https://rdrr.io/cran/brazilmaps/man/get_brmap.html)).

### Supplementary Figure 3

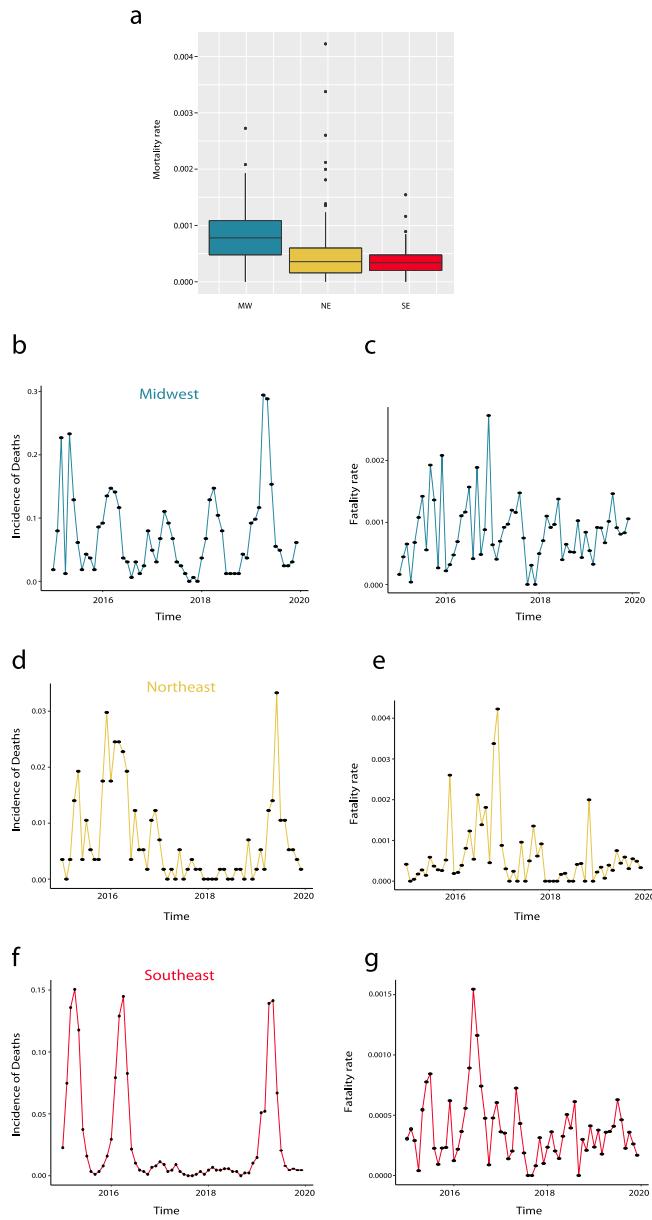

**Supplementary Figure 3. Mosquito-borne viral suitability measure (index P).** **a.** Daily mosquito-viral suitability measure (index P) for each of the macro regions from which new genomes were generated. The index P is obtained by averaging the climatic time series of the three largest urban centers in each region and then independently estimating index P. These series are presented in Figure 1 of the main text. **b.** Daily mosquito-viral suitability measure (index P) for the three cities per macro region used for panel A and for the main text. Cities are named in the color legend and tagged with their macro region. **(a-b)** The entomological and epidemiological priors used to estimate P are the (dengue) default for the MVSE R-package<sup>49</sup> (see Supplementary File 1). Source data are provided as a Source Data file.

## Supplementary Figure 4

**Supplementary Figure 4. Weekly notified dengue cases normalized per 100K individuals per region in 2015-2020 (until EW06).** DENV epidemic curves are coloured according to geographical macro region: SE=Southeast, NE=Northeast, MW=Midwest. CHIKV epidemic curves are coloured in black for each of the macro regions. Incidence (cases per 100K population) is presented in log10 for visual purposes. Source data are provided as a Source Data file.

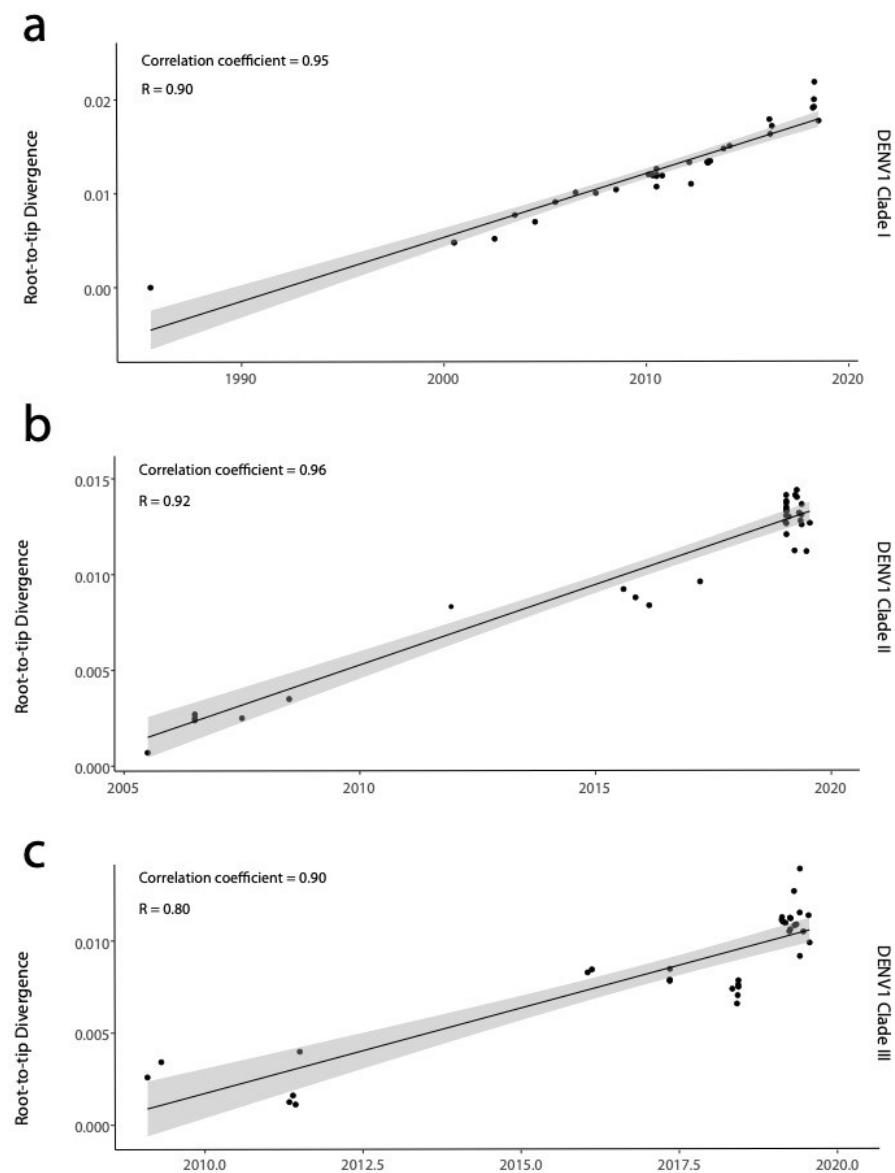

## Supplementary Figure 5

**Supplementary Figure 5. DENV mortality in Brazil, 2015-2019.** **a.** Boxplot of the case fatality rate (deaths/cases) of dengue in the three Brazilian regions sampled in this study, 2015-2019. Boxplots are coloured according to Brazilian geographical region, Midwest (MW) n=8, Northeast (NE) n=11, and Southeast (SE) n=20. Boxplots show interquartile ranges, white lines are medians and box whiskers show the full range of posterior distribution. **b-c.** Time series of the incidence of deaths (number of fatal dengue /number of cases) reported weekly (c) and case fatality rate (number of fatal dengue /number of cases per 100K population) (d) in MW. **d-e.** Same as b and c but for NE. **f-g.** Same as b and c but for SE. Dates

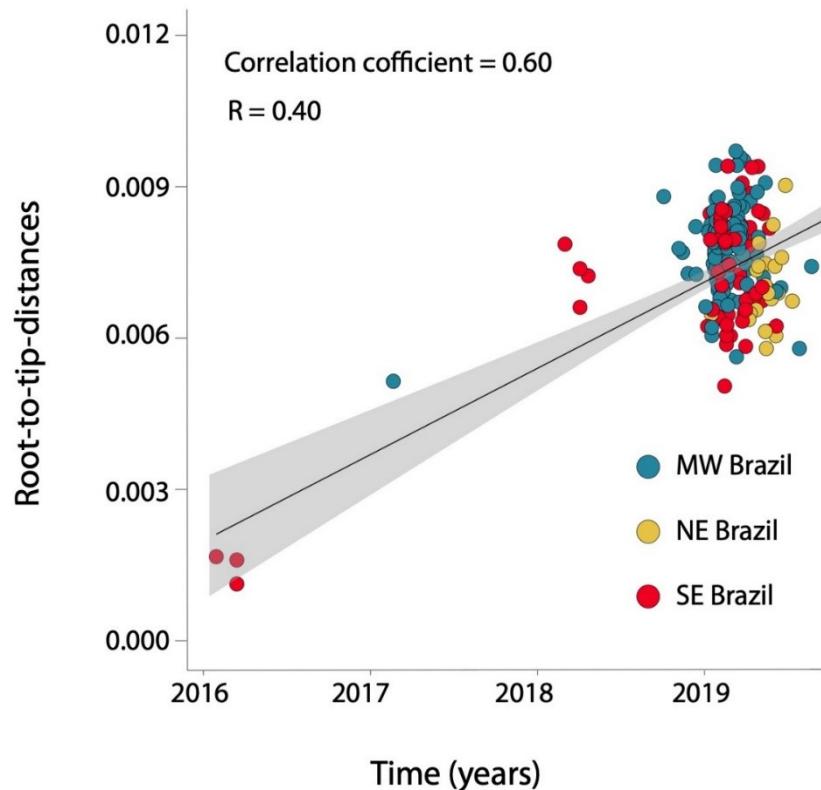

with no deaths reported were assumed to be reflective of no deaths, although it is possible that some instances of no deaths reflect a lack of reporting. Source data are provided as a Source Data file.

## Supplementary Figure 6

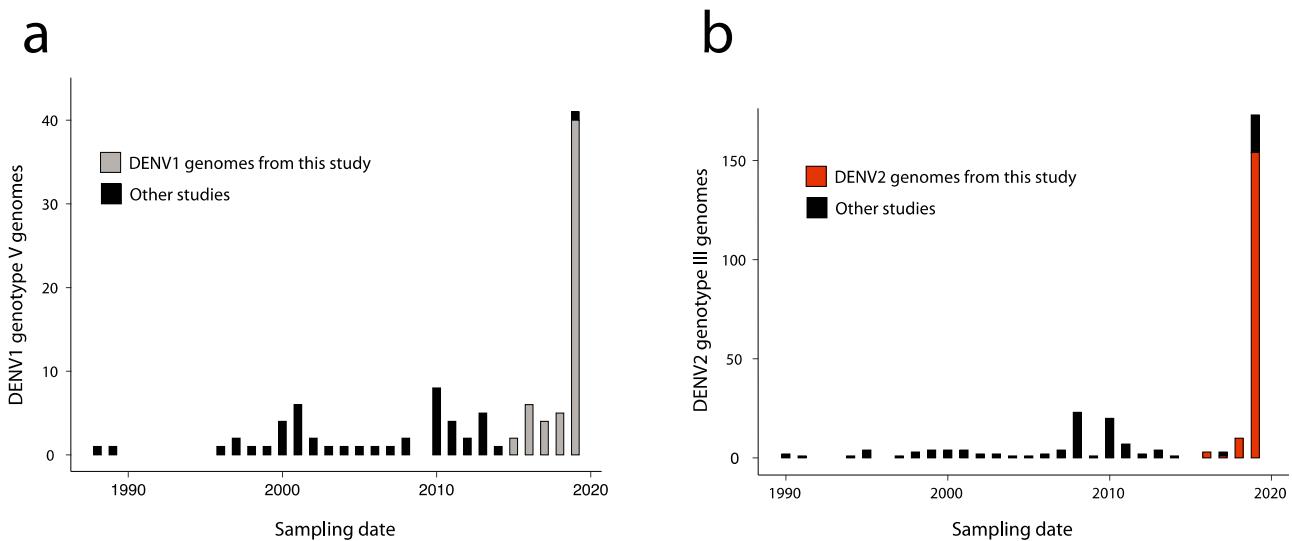

**Supplementary Figure 6. Analysis of temporal structure in DENV1 genotype V clades I-III.** **a.** Root-to-tip genetic divergence of Clade I against time of sampling ( $n=33$ ) **b.** Root-to-tip genetic divergence for Clade II against time of sampling ( $n=34$ ). **c.** Root-to-tip genetic divergence for Clade III against time of sampling ( $n=34$ ). Black lines represent the medium values of the linear regression despite the grey ones represent the interval among the minimum and maximum values.

## Supplementary Figure 7

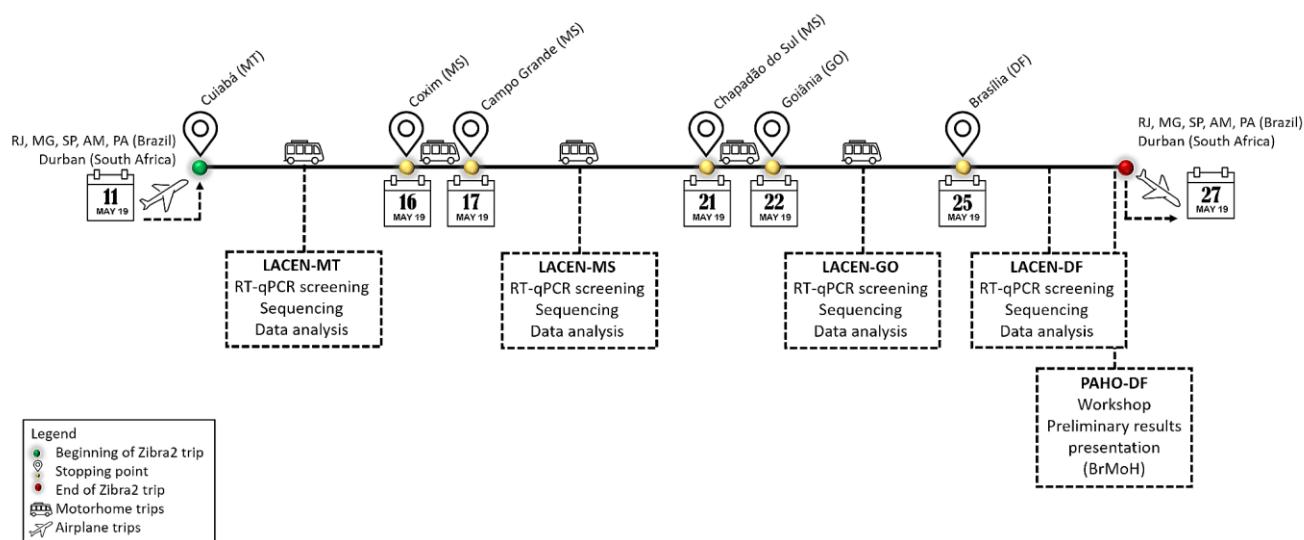

**Supplementary Figure 7. Genetic divergence regressed against date of sample collection for the BR-4 clade of DENV2 ( $n=181$ ).** MW=Brazilian Midwest, NE Brazil=Brazilian Northeast, SE Brazil=Brazilian Southeast. Black lines represent the medium values of the linear regression despite the grey ones represent the interval among the minimum and maximum values.

## Supplementary Figure 8

**Supplementary Figure 8. Number of complete DENV1 and DENV2 genomes sequences from Brazil, 1988-2020.** **a.** Comparative bar chart of the number of DENV1 genotype V complete genomes sequences generated in Brazil between 1988 and 2020 and available in public databases until May 2020. Gray bars represent the genomes from this study, while green bars indicate the genomes from previous studies. **b.** Comparative bar chart of the number of DENV2 genotype III complete genomes sequences generated in Brazil between 1990 and 2020 and available in public databases until May 2020. Red bars represent the genomes from this study, while green bars indicate the genomes from previous studies. Source data are provided as a Source Data file.

## Supplementary Figure 9

**Supplementary Figure 9. Timeline of the ZIBRA2 itinerant project across the Brazilian Midwest region.** Researchers from Brazil (RJ=Rio de Janeiro, MG=Minas Gerais, SP=São Paulo, AM=Amazonas, and PA=Pará) and from Durban (South Africa) visited the public health laboratories (LACEN) in the Brazilian Midwest region (showed above the line) on board a mobile laboratory (motorhome) to carry out the field genomic surveillance activities (showed below the line). The event ended in a workshop held at PAHO/WHO to present the preliminary results to the health authorities. MT=Mato Grosso, MS=Mato Grosso do Sul, GO=Goiás, DF=Brazilian Federal District. The Bus and Airplane icons were created by Mariagloria Posani and Kiddo, respectively, and are currently available at the Noun Project (<https://thenounproject.com/>).

**Supplementary Table 1. Number of molecularly confirmed DENV cases in the three Brazilian macro regions, 2015-2020.**

REGION	SEROTYPE	YEAR					
		2015	2016	2017	2018	2019	2020*
MW	DENV1	2467	970	55	16	27	40
	DENV2	28	19	231	520	2361	2184
	DENV3	2	2	1	0	0	20
	DENV4	219	64	23	1	2	0

**Supplementary Table 6. Members of Latin American Genomic Surveillance Arboviral Network.**

Complete name	Affiliation
Erenilde Marques de Cerqueira	Universidade Estadual de Feira de Santana, Salvador, Bahia, Brazil
Tiago Graf	Instituto Gonçalo Moniz, Fundação Oswaldo Cruz, Salvador, Bahia, Brazil
Walter Ramalho	Universidade de Brasília, Brasília, Distrito Federal, Brazil
Wildo Navegantes	Universidade de Brasília, Brasília, Distrito Federal, Brazil
Renato Barbosa Reis	Universidade Salvador, Salvador, Bahia, Brazil
Clara Guerra Duarte	Fundação Ezequiel Dias, Belo Horizonte, Minas Gerais, Brazil
Maira Alves Pereira	Fundação Ezequiel Dias, Belo Horizonte, Minas Gerais, Brazil
Paulo Eduardo de Souza da Silva	Fundação Ezequiel Dias, Belo Horizonte, Minas Gerais, Brazil
Raoni Almeida de Souza	Fundação Ezequiel Dias, Belo Horizonte, Minas Gerais, Brazil
Alex Pauvolid-Corrêa	Laboratório de Flavivírus, Instituto Oswaldo Cruz, Fundação Oswaldo Cruz, Rio de Janeiro, Rio de Janeiro, Brazil
Anne Aline Pereira de Paiva	Laboratório de Flavivírus, Instituto Oswaldo Cruz, Fundação Oswaldo Cruz, Rio de Janeiro, Rio de Janeiro, Brazil
Hegger Machado Fritsch	Laboratório de Flavivírus, Instituto Oswaldo Cruz, Fundação Oswaldo Cruz, Rio de Janeiro, Rio de Janeiro, Brazil
Maria Angélica Mares-Guia	Laboratório de Flavivírus, Instituto Oswaldo Cruz, Fundação Oswaldo Cruz, Rio de Janeiro, Rio de Janeiro, Brazil
Maria Celeste Torres	Laboratório de Flavivírus, Instituto Oswaldo Cruz, Fundação Oswaldo Cruz, Rio de Janeiro, Rio de Janeiro, Brazil
Maurício Teixeira Lima	Laboratório de Flavivírus, Instituto Oswaldo Cruz, Fundação Oswaldo Cruz, Rio de Janeiro, Rio de Janeiro, Brazil
Patrícia Sequeira	Laboratório de Flavivírus, Instituto Oswaldo Cruz, Fundação Oswaldo Cruz, Rio de Janeiro, Rio de Janeiro, Brazil
William de Almeida Marques	Laboratório de Flavivírus, Instituto Oswaldo Cruz, Fundação Oswaldo Cruz, Rio de Janeiro, Rio de Janeiro, Brazil
Jorlan Fernandes de Jesus	Laboratório de Hantaviroses e Rickettsioses, Instituto Oswaldo Cruz, Fundação Oswaldo Cruz, Rio de Janeiro, Rio de Janeiro, Brazil
Felipe Gomes Naveca	Laboratório de Ecologia de Doenças Transmissíveis na Amazônia, Instituto Leônidas e Maria Deane, Fundação Oswaldo Cruz, Manaus, Amazonas, Brazil
Alessandra Lima Silva	Instituto de Ciências Biológicas, Universidade Federal de Minas Gerais, Belo Horizonte, Minas Gerais, Brazil
Anne Cybelle Pinto	Instituto de Ciências Biológicas, Universidade Federal de Minas Gerais, Belo Horizonte, Minas Gerais, Brazil
Arun Kumar Jaiswal	Instituto de Ciências Biológicas, Universidade Federal de Minas Gerais, Belo Horizonte, Minas Gerais, Brazil
Élisson Nogueira Lopes	Instituto de Ciências Biológicas, Universidade Federal de Minas Gerais, Belo Horizonte, Minas Gerais, Brazil
Francielly Morais Rodrigues da Costa	Instituto de Ciências Biológicas, Universidade Federal de Minas Gerais, Belo Horizonte, Minas Gerais, Brazil
Gabriel Quintanilha-Peixoto	Instituto de Ciências Biológicas, Universidade Federal de Minas Gerais, Belo Horizonte, Minas Gerais, Brazil
Gilson Carlos Soares	Instituto de Ciências Biológicas, Universidade Federal de Minas Gerais, Belo Horizonte, Minas Gerais, Brazil
Paula Luize Camargos Fonseca	Instituto de Ciências Biológicas, Universidade Federal de Minas Gerais, Belo Horizonte, Minas Gerais, Brazil
Renan Pedra de Souza	Instituto de Ciências Biológicas, Universidade Federal de Minas Gerais, Belo Horizonte, Minas Gerais, Brazil
Rodrigo Bentes Kato	Instituto de Ciências Biológicas, Universidade Federal de Minas Gerais, Belo Horizonte, Minas Gerais, Brazil
Rodrigo Profeta Silveira Santos	Instituto de Ciências Biológicas, Universidade Federal de Minas Gerais, Belo Horizonte, Minas Gerais, Brazil
Sandeep Tiwari	Instituto de Ciências Biológicas, Universidade Federal de Minas Gerais, Belo Horizonte, Minas Gerais, Brazil
Wylerson Guimarães Nogueira	Instituto de Ciências Biológicas, Universidade Federal de Minas Gerais, Belo Horizonte, Minas Gerais, Brazil
Beatriz Senra Álvares da Silva Santos	Faculdade de Medicina Veterinária, Universidade Federal de Minas Gerais, Belo Horizonte, Minas Gerais, Brazil
Bruna Lopes Bueno	Faculdade de Medicina Veterinária, Universidade Federal de Minas Gerais, Belo Horizonte, Minas Gerais, Brazil
Isadora Cristina de Siqueira	Instituto Gonçalo Moniz, Fundação Oswaldo Cruz, Salvador, Bahia, Brazil
Lourdes Farre Vallve	Instituto Gonçalo Moniz, Fundação Oswaldo Cruz, Salvador, Bahia, Brazil
Melina Mosquera Navarro Borba	Instituto Gonçalo Moniz, Fundação Oswaldo Cruz, Salvador, Bahia, Brazil

Alix Sandra Mazzetto	Laboratório Central de Saúde Pública do Estado do Paraná, Curitiba, Paraná, Brazil
Francisco de Assis Araújo Aguiar	Laboratório Central de Saúde Pública do Estado de Rondônia, Porto Velho, Rondônia, Brazil
Irenio da Silva Gomes	Laboratório Central de Saúde Pública do Estado do Amazonas, Manaus, Amazonas, Brazil
Jayra Juliana Paiva Alves Abrantes	Laboratório Central de Saúde Pública do Estado do Rio Grande do Norte, Natal, Rio Grande do Norte, Brazil
Luiz Takao Watanabe	Laboratório Central de Saúde Pública do Estado de Mato Grosso, Cuiabá, Mato Grosso, Brazil
Marta Ferreira da Silva Rego	Laboratório Central de Saúde Pública Professor Gonçalo Muniz, Salvador, Bahia, Brazil
Vanessa Brandão Nardy	Laboratório Central de Saúde Pública Professor Gonçalo Muniz, Salvador, Bahia, Brazil
Shirlei Ferreira de Aguiar	Laboratório Central de Saúde Pública Noel Nutels, Rio de Janeiro, Rio de Janeiro, Brazil
Fabiana Cristina Pereira dos Santos	Instituto Adolfo Lutz, São Paulo, São Paulo, Brazil
Alice Louize Nunes Queiroz	Instituto Evandro Chagas, Belém, Pará, Brazil
Bruno Tardelli Diniz Nunes	Instituto Evandro Chagas, Belém, Pará, Brazil
Lívia Carício Martins	Instituto Evandro Chagas, Belém, Pará, Brazil
Márcio Roberto Teixeira Nunes	Instituto Evandro Chagas, Belém, Pará, Brazil
Flávia Cristina da Silva Salles	Instituto de Medicina Tropical, Universidade de São Paulo, São Paulo, São Paulo, Brazil
Ingra Morales Claro	Instituto de Medicina Tropical, Universidade de São Paulo, São Paulo, São Paulo, Brazil
Jaqueleine Goes de Jesus	Instituto de Medicina Tropical, Universidade de São Paulo, São Paulo, São Paulo, Brazil
Darlan da Silva Cândido	Department of Zoology, Peter Medawar Building, University of Oxford, Oxford, United Kingdom
Cintia Marcela Fabbri	Instituto Nacional de Enfermedades Virales Humanas Dr. Julio Maiztegui, Pergamino, Argentina
Claudia González	Gorgas Memorial Institute for Health Studies, Panama, Panama
Lisseth Saéz	Gorgas Memorial Institute for Health Studies, Panama, Panama
Maria Chen-Germán	Gorgas Memorial Institute for Health Studies, Panama, Panama
Jaime Lagos Barrera	Instituto de Salud Pública de Chile, Santiago, Chile
José Ernesto Ramírez-González	Instituto de Diagnóstico y Referencia Epidemiológicos Dr. Manuel Martínez Báez, Ciudad de México, México
Josefina Campos	Instituto Nacional de Enfermedades Infecciosas Dr Carlos G Malbrán, Buenos Aires, Argentina
Noelia Morel Faller	Ministerio de Salud Pública de Uruguay, Montevideo, Uruguay
Marta Eugenia Víquez Villalobos	Instituto Costarricense de Investigación y Enseñanza em Nutrição y Salud, Tres Ríos, Costa Rica
Roberto Kaslin	Instituto Nacional de Investigacion en Salud Publica Dr Leopoldo Izquierdo Pérez, Guayaquil, Ecuador
Silvia Paola Salgado Cisneros	Instituto Nacional de Investigacion en Salud Publica Dr Leopoldo Izquierdo Pérez, Guayaquil, Ecuador
Flávia Figueira Aburjaile	Universidade Federal de Pernambuco, Recife, Pernambuco, Brazil
Carolina Dourado Amaral	Secretaria de Saúde do Estado de Minas Gerais, Belo Horizonte, Minas Gerais, Brazil
Danielle Bandeira Costa de Sousa Freire	Secretaria de Vigilância em Saúde/Ministério da Saúde, Brasília, Distrito Federal, Brazil
Laura Nogueira Cruz	Secretaria de Vigilância em Saúde/Ministério da Saúde, Brasília, Distrito Federal, Brazil
Daniel Mattos	Universidade Federal do Rio de Janeiro, Rio de Janeiro, Rio de Janeiro, Brazil
Leandro Ferreira Lopes Landeira	Universidade Federal do Rio de Janeiro, Rio de Janeiro, Rio de Janeiro, Brazil
Mariane Talon de Menezes	Universidade Federal do Rio de Janeiro, Rio de Janeiro, Rio de Janeiro, Brazil
Ieda Maria Orioli	Universidade Federal do Rio de Janeiro, Rio de Janeiro, Rio de Janeiro, Brazil
Ariane Coelho Ferraz	Universidade Federal de Ouro Preto, Ouro Preto, Minas Gerais, Brazil
Daiane Teixeira de Oliveira	Universidade Federal de Ouro Preto, Ouro Preto, Minas Gerais, Brazil
Alexandre Barbosa Reis	Universidade Federal de Ouro Preto, Ouro Preto, Minas Gerais, Brazil
Renata Guerra de Sá Cota	Universidade Federal de Ouro Preto, Ouro Preto, Minas Gerais, Brazil
Rafael dos Santos Bezerra	Fundação Hemocentro de Ribeirão Preto, Ribeirão Preto, São Paulo, Brazil
Melissa Barreto Falcão	Secretaria de Saúde de Feira de Santana, Feira de Santana, Bahia, Brazil
Rodrigo Dias de Oliveira Carvalho	Sechenov First Moscow State Medical University, Moscou, Russia

### ***Course “Nanopore-based genome sequencing technology for temporal investigation and epidemiology of dengue outbreak: training, research, surveillance, and scientific dissemination”***

Recent progress in the sequencing of Ebola, Zika, and yellow fever viruses using Oxford Nanopore sequencing technology have shown that high quality complete genome sequences can be generated in real time during viral outbreaks and epidemics.<sup>1-3</sup> Portability and rapid production of data allows generation of genomes at the source of outbreaks, which in turn facilitate rapid intervention. Considering this and the strengthening of surveillance actions in Latin America, the Pan American Health Organization/World Health Organization (PAHO/WHO), together with the Brazilian Ministry of Health (BrMoH), planned the course entitled “Nanopore-based genome sequencing technology for temporal investigation and epidemiology of dengue outbreak: training, research, surveillance, and scientific dissemination”, under the coordination of Prof. Dr. Luiz Alcantara, researcher at Fundação Oswaldo Cruz (<https://portal.fiocruz.br/>).

The course took place in the city of Belo Horizonte, Minas Gerais state, from August 19 to 30, 2019 and it aimed at carrying out activities central to arbovirus genomic surveillance, focusing on the training of participants, dissemination of knowledge, and scientific communication. The course was taught by experienced researchers from national and international institutions, such as Oxford University (United Kingdom), University of KwaZulu-Natal (South Africa), Universidade Nova de Lisboa (Portugal), Sechenov First Moscow State Medical University (Russia), Oswaldo Cruz Foundation (Brazil), Federal University of Minas Gerais (Brazil), Federal University of Rio de Janeiro (Brazil), Federal University of Pernambuco (Brazil), University of São Paulo (Brazil), University of Brasilia (Brazil), State University of Feira de Santana (Brazil), and University of Salvador (Brazil). The course had 62 students from 34 national and international institutions. In addition to post-graduate students, course participants included laboratory technicians and health practitioners in universities and laboratories from several institutions responsible for laboratory-based surveillance of emerging and reemerging diseases, such as the Central Public Health Laboratories of the Brazilian states from the BrMoH's public laboratories network and public health laboratories from Paraguay, Argentina, Panama, Chile, Mexico, Uruguay, Costa Rica, and Ecuador.

The course lasted two weeks and comprised theoretical and practical classes focused on genomic surveillance of dengue (DENV1 and DENV2 serotypes), which was responsible for a large epidemic in

2019, accounting for 1,544,987 cases reported in Brazil.<sup>4</sup> The first week of training addressed the genomic sequencing protocol using Nanopore technology and analysis of clinical and epidemiological data from selected samples collected in three Brazilian macro-regions (Midwest, Southeast, and Northeast), which historically has reported the largest incidences of dengue.<sup>5</sup> In that stage, participants learned how to prepare DNA library and sequencing using the MinION portable sequencer (Oxford Nanopore Technologies). They were also trained on the generation of consensus sequences and genotyping using the Genome Detective tool (<https://www.genomedetective.com/>), on basic topics of epidemiological modeling, and epidemiological maps using R and QGIS software. The second week of the course focused on evolutionary analysis using the genome sequences of DENV1 and DENV2 generated in the previous week. Participants were trained in genomic data preparation, construction of genome dataset from public databases (such as Genbank and ViPR), genome alignment, alignment editing, phylogenetic reconstructions by Maximum Likelihood (ML) approach, in addition to temporal and phylogeographic inference using Bayesian approaches. Participants carried out preliminary epidemiological and evolutionary analyzes for the preparation of this manuscript.

**Date:** August 19-30, 2019

**City:** Belo Horizonte, Minas Gerais state, Brazil

**Course hours:** 96 hours (40h of theoretical classes and 56h of practical classes)

## FUNDING

Pan American World Health Organization (PAHO/WHO) and Secretaria de Vigilância em Saúde (SVS)/Brazilian Ministry of Health.

## ORGANIZERS

- Luiz Carlos Junior Alcantara, Laboratório de Flavivírus, Instituto Oswaldo Cruz, Fundação Oswaldo Cruz, Rio de Janeiro, Rio de Janeiro Brazil;
- Carlos Frederico Campelo de Albuquerque, Organização Pan-Americana da Saúde/Organização Mundial da Saúde, Brasília, Distrito Federal, Brazil;
- André Luiz de Abreu, Coordenação Geral dos Laboratórios de Saúde Pública, Secretaria de Vigilância em Saúde, Ministério da Saúde, Brasília, Distrito Federal, Brazil;
- Rodrigo Fabiano do Carmo Said, Coordenação Geral das Arboviroses, Secretaria de Vigilância em Saúde/Ministério da Saúde, Brasília, Distrito Federal, Brazil;

- Marluce Aparecida Assunção Oliveira, Laboratório Central de Saúde Pública do Estado de Minas Gerais, Fundação Ezequiel Dias, Belo Horizonte, Minas Gerais, Brazil;
- Mauricio Abreu Santos, Laboratório Central de Saúde Pública do Estado de Minas Gerais, Fundação Ezequiel Dias, Belo Horizonte, Minas Gerais, Brazil;
- Maricélia Maia de Lima, Secretaria de Saúde de Feira de Santana, Feira de Santana, Bahia, Brazil;
- Gabriel Muricy Cunha, Secretaria de Saúde do Estado da Bahia, Salvador, Bahia, Brazil;
- Vinicius Lemes da Silva, Laboratório Central de Saúde Pública Dr. Giovanni Cysneiros, Goiânia, Goiás, Brazil;
- Ana Maria Bispo de Fellipis, Laboratório de Flavivírus, Instituto Oswaldo Cruz, Fundação Oswaldo Cruz, Rio de Janeiro, Rio de Janeiro, Brazil;
- Vasco Azevedo, Instituto de Ciências Biológicas, Universidade Federal de Minas Gerais, Belo Horizonte, Minas Gerais, Brazil;
- Marta Giovanetti, Laboratório de Flavivírus, Instituto Oswaldo Cruz, Fundação Oswaldo Cruz, Rio de Janeiro, Rio de Janeiro, Brazil.

## **LECTURERS**

### **International**

- José Lourenço, Department of Zoology, Peter Medawar Building, University of Oxford, Oxford, United Kingdom;
- Tulio de Oliveira, KwaZulu-Natal Research Innovation and Sequencing Platform (KRISP), College of Health Sciences, University of KwaZulu-Natal, Durban, South Africa.

### **Brazilian**

- Luiz Carlos Junior Alcantara, Laboratório de Flavivírus, Instituto Oswaldo Cruz, Fundação Oswaldo Cruz, Rio de Janeiro, Rio de Janeiro, Brazil;
- Rivaldo Venâncio, Fundação Oswaldo Cruz, Bio-Manguinhos, Rio de Janeiro, Rio de Janeiro, Brazil;
- Ana Maria Bispo de Fellipis, Laboratório de Flavivírus, Instituto Oswaldo Cruz, Fundação Oswaldo Cruz, Rio de Janeiro, Rio de Janeiro, Brazil;

- Rita Maria Ribeiro Nogueira, Laboratório de Flavivírus, Instituto Oswaldo Cruz, Fundação Oswaldo Cruz, Rio de Janeiro, Rio de Janeiro, Brazil;
- Erenilde Marques de Cerqueira, Universidade Estadual de Feira de Santana, Salvador, Bahia, Brazil;
- Wildo Navegantes de Araújo, Universidade de Brasília, Brasília, Distrito Federal, Brazil;
- Melissa Barreto Falcão, Secretaria de Saúde de Feira de Santana, Feira de Santana, Bahia, Brazil;
- Renato Barbosa Reis, Universidade Salvador, Salvador, Bahia, Brazil;
- Tiago Graf, Instituto Gonçalo Moniz, Fundação Oswaldo Cruz, Salvador, Bahia, Brazil;
- Marta Giovanetti, Laboratório de Flavivírus, Instituto Oswaldo Cruz, Fundação Oswaldo Cruz, Rio de Janeiro, Rio de Janeiro, Brazil;
- Ingra Morales Claro, Instituto de Medicina Tropical, Universidade de São Paulo, São Paulo, São Paulo, Brazil;
- Jaqueline de Jesus, Instituto de Medicina Tropical, Universidade de São Paulo, São Paulo, São Paulo, Brazil;
- Isadora Cristina de Siqueira, Instituto Gonçalo Moniz, Fundação Oswaldo Cruz, Salvador, Bahia, Brazil;
- Joilson Xavier, Laboratório de Flavivírus, Instituto Oswaldo Cruz, Fundação Oswaldo Cruz, Rio de Janeiro, Rio de Janeiro, Brazil;
- Mariane Talon Menezes, Universidade Federal do Rio de Janeiro, Rio de Janeiro, Rio de Janeiro, Brazil;
- Flavia Cristina da Silva Sales, Instituto de Medicina Tropical, Universidade de São Paulo, São Paulo, São Paulo, Brazil;
- Fernanda de Bruycker Nogueira, Laboratório de Flavivírus, Instituto Oswaldo Cruz, Fundação Oswaldo Cruz, Rio de Janeiro, Rio de Janeiro, Brazil;
- Felipe Campos de Melo Iani, Laboratório Central de Saúde Pública do Estado de Minas Gerais, Fundação Ezequiel Dias, Belo Horizonte, Minas Gerais, Brazil;
- Talita Émile Ribeiro Adelino, Laboratório Central de Saúde Pública do Estado de Minas Gerais, Fundação Ezequiel Dias, Belo Horizonte, Minas Gerais, Brazil;
- Valdinete Alves do Nascimento, Laboratório de Ecologia de Doenças Transmissíveis na Amazônia, Instituto Leônidas e Maria Deane, Fiocruz, Manaus, Amazonas, Brazil;
- Allison de Araújo Fabri, Laboratório de Flavivírus, Instituto Oswaldo Cruz, Fundação Oswaldo Cruz, Rio de Janeiro, Rio de Janeiro, Brazil;

- Flávia Löwen Levy Chalhoub, Laboratório de Flavivírus, Instituto Oswaldo Cruz, Fundação Oswaldo Cruz, Rio de Janeiro, Rio de Janeiro, Brazil;
- Álvaro Salgado de Abreu, Laboratório de Flavivírus, Instituto Oswaldo Cruz, Fundação Oswaldo Cruz, Rio de Janeiro, Rio de Janeiro, Brazil;
- Wagner Fonseca, Laboratório de Flavivírus, Instituto Oswaldo Cruz, Fundação Oswaldo Cruz, Rio de Janeiro, Rio de Janeiro, Brazil;
- Francielly Rodrigues da Costa, Instituto de Ciências Biológicas, Universidade Federal de Minas Gerais, Belo Horizonte, Minas Gerais, Brazil;
- Jorlan Fernandes de Jesus, Laboratório de Hantaviroses e Rickettsioses, Instituto Oswaldo Cruz, Fundação Oswaldo Cruz, Rio de Janeiro, Rio de Janeiro, Brazil;
- Maricélia Maia de Lima, Secretaria de Saúde de Feira de Santana, Feira de Santana, Bahia, Brazil;
- Victor Pimentel, Instituto de Higiene e Medicina Tropical, Universidade Nova de Lisboa, Lisboa, Portugal;
- Darlan da Silva Cândido, Department of Zoology, Peter Medawar Building, University of Oxford, Oxford, United Kingdom;
- Flávia Figueira Aburjaile, Universidade Federal de Pernambuco, Recife, Pernambuco, Brazil;
- Rodrigo Días de Oliveira Carvalho, Sechenov First Moscow State Medical University, Moscow, Russia.

## STUDENTS

Name	Affiliation	Country
Clara Guerra Duarte	Fundação Ezequiel Dias, Belo Horizonte, Minas Gerais, Brazil	Brazil
Maira Alves Pereira	Fundação Ezequiel Dias, Belo Horizonte, Minas Gerais, Brazil	Brazil
Paulo Eduardo de Souza da Silva	Fundação Ezequiel Dias, Belo Horizonte, Minas Gerais, Brazil	Brazil
Raoni Almeida de Souza	Fundação Ezequiel Dias, Belo Horizonte, Minas Gerais, Brazil	Brazil
Anne Aline Pereira de Paiva	Laboratório de Flavivírus, Instituto Oswaldo Cruz, Fundação Oswaldo Cruz, Rio de Janeiro, Rio de Janeiro, Brazil	Brazil
Hegger Machado Fritsch	Laboratório de Flavivírus, Instituto Oswaldo Cruz, Fundação Oswaldo Cruz, Rio de Janeiro, Rio de Janeiro, Brazil	Brazil
Maria Angélica Mares-Guia	Laboratório de Flavivírus, Instituto Oswaldo Cruz, Fundação Oswaldo Cruz, Rio de Janeiro, Rio de Janeiro, Brazil	Brazil
Maurício Teixeira Lima	Laboratório de Flavivírus, Instituto Oswaldo Cruz, Fundação Oswaldo Cruz, Rio de Janeiro, Rio de Janeiro, Brazil	Brazil
Stephane Fraga de Oliveira Tosta	Laboratório de Flavivírus, Instituto Oswaldo Cruz, Fundação Oswaldo Cruz, Rio de Janeiro, Rio de Janeiro, Brazil	Brazil

Ronaldo de Jesus	Coordenação Geral dos Laboratórios de Saúde Pública/Secretaria de Vigilância em Saúde, Ministério da Saúde, Brasília, Distrito Federal, Brazil	Brazil
Emerson Luiz Lima de Araújo	Coordenação Geral dos Laboratórios de Saúde Pública/Secretaria de Vigilância em Saúde, Ministério da Saúde, Brasília, Distrito Federal, Brazil	Brazil
Carlos Frederico Campelo de Albuquerque	Organização Pan-Americana da Saúde/Organização Mundial da Saúde, Brasília, Distrito Federal, Brazil	Brazil

## COURSE SCHEDULE

**Day 1 – Monday – August 19, 2019 – Wet laboratories from Fundação Ezequiel Dias (FUNED)**

**(Coordinator: Ingra Morales)**

**08:00-09:00:** Introduction to Nanopore-based sequencing technology. From sample handling to sequencing PCR. Lecturers: Ingra Morales e Jaqueline de Jesus (theory). Participants splitting into 3 classes of 12 students/class (A, B e C).

**09:00-12:00:** Library preparation:

**Group A:** DENV Library preparation from selected samples for group/class A. Lecturers: Jaqueline de Jesus, Flávia Sales, Valdinete Nascimento, and Flávia Chalhoub. (Theory and practice)

**Group B:** DENV Library preparation from selected samples for group/class B. Lecturers: Ingra Morales, Talita Adelino, Fernanda Nogueira, and Allison Fabri. (Theory and practice)

**Group C:** DENV Library preparation from selected samples for group/class C. Lecturers: Joilson Xavier, Mariane Menezes, Darlan Candido, and Felipe Iani. (Theory and practice)

**12:00-13:00:** Lunch time

**13:00-16:00:** DNA library preparation and sequencing on MinION. Wet lab at FUNED:

**Group A:** DNA library preparation and sequencing on MinION of samples from Group A. Lecturers: Jaqueline de Jesus, Flávia Sales, Valdinete Nascimento, and Flávia Chalhoub. (Theory and practice)

**Group B:** DNA library preparation and sequencing on MinION of samples from Group B. Lecturers: Ingra Morales, Talita Adelino, Fernanda Nogueira, and Allison Fabri. (Theory and practice)

**Turma C:** DNA library preparation and sequencing on MinION of samples from Group C. Lecturers: Joilson Xavier, Mariane Menezes, Darlan Candido, and Felipe Iani. (Theory and practice)

**16:00-16:30:** Coffee Break

**16:30-17:00: Amphitheater at FUNED:** Course presentation (Prof. Luiz Alcantara) and guests (Andre Abreu, Julio Croda, Wanderson Oliveira, Rodrigo Said, Carlos Eduardo Amaral Pereira da Silva, Dario Brock Ramalho, Maurício Santos, Marluce Oliveira, Gabriel Muricy, and Vinicius Silva)

**17:00-17:30: Amphitheater at FUNED:** Presentation of the coordination of the dengue surveillance group/DEVIT/SVS-MS and PAHO/WHO in Brazil. "Panorama and surveillance of dengue in the current outbreak in Brazil". Lecturer: Rodrigo Said

**17:30-18:00: Amphitheater at FUNED:** Historical overview of the dengue epidemic in Brazil. Lecturers: Rita Nogueira (speaker) and Ana de Filippis (moderator)

**18:00-18:30: Amphitheater at FUNED:** Genomic surveillance of arboviruses in Brazil and Paraguay.  
Lecturer: Luiz Alcantara.

**Day 2 – Tuesday - August 20, 2019 – Computer room**  
**(Coordinator: Wildo Navegantes)**

**08:00-12:00:** Basic concepts of “R” applied to studies of epidemiological modeling. Lecturers: Álvaro Salgado, Vagner Fonseca, Francielly Rodrigues, and Rodrigo Kato. (Theory)

**12:00-13:30:** Lunch time.

**13:30-15:10:** Basic concepts of “R” applied to studies of epidemiological modeling. Lecturers: Álvaro Salgado, Vagner Fonseca, Francielly Rodrigues, and Rodrigo Kato. (Theory and practice)

**15:10-15:30:** Coffee Break

**15:30-17:00:** Basic concepts of “R” applied to studies of epidemiological modeling. Lecturers: Álvaro Salgado, Vagner Fonseca, Francielly Rodrigues, and Rodrigo Kato. (Practice)

**Day 3 – Wednesday - August 21, 2019 – Computer room**  
**(Coordinator: Renato Reis)**

**08:00-12:00:** Basic concepts of “R” applied to studies of epidemiological modeling. Lecturers: Álvaro Salgado, Vagner Fonseca, Francielly Rodrigues, and Rodrigo Kato. (Theory)

**12:00-13:30:** Lunch time.

**13:30-15:10:** Basic concepts of “R” applied to studies of epidemiological modeling. Lecturers: Álvaro Salgado, Vagner Fonseca, Francielly Rodrigues, and Rodrigo Kato. (Theory and practice)

**15:10-15:30:** Coffee Break

**15:30-17:00:** Basic concepts of "R" applied to studies of epidemiological modeling. Lecturers: Álvaro Salgado, Vagner Fonseca, Fracielly Rodrigues, and Rodrigo Kato. (Practice)

**Day 4 – Thursday - August 22, 2019 – Computer room**  
**(Coordinator: José Lourenço)**

**08:00-12:00:** Epidemiological modeling to predict outbreaks of arboviral diseases and estimation of epidemiological parameters of outbreaks. Lecturers: José Lourenço. (Theory)

**12:00-13:30:** Lunch time.

**13:30-15:10:** Epidemiological modeling to predict outbreaks of arboviral diseases and estimation of epidemiological parameters of outbreaks. Lecturers: José Lourenço, Erenilde Cerqueira, and Wildo Navegantes. (Theory and practice)

**15:10-15:30:** Coffee Break

**15:30-17:00:** Epidemiological modeling to predict outbreaks of arboviral diseases and estimation of epidemiological parameters of outbreaks. Lecturers: José Lourenço, Erenilde Cerqueira, and Wildo Navegantes. (Practice)

**Day 5 – Friday - August 23, 2019 – Computer room**  
**(Coordinators: Wildo Navegantes and Renato Reis)**

**08:00-12:00:** Implementation of epidemiological maps from raw data, using "R" and "QGIS", and calculation of spatial and temporal determinants in arboviral infections. Lecturers: Renato Reis and Wildo Navegantes. (Theory)

**12:00-13:30:** Lunch time.

**13:30-15:10:** Implementation of epidemiological maps from raw data, using "R" and "QGIS", and calculation of spatial and temporal determinants in arboviral infections. Lecturers: Renato Reis, Wildo Navegantes, Isadora de Siqueira, and Maricélia Lima. (Theory and practice)

**15:10-15:30:** Coffee Break

**15:30-17:00:** Implementation of epidemiological maps from raw data, using "R" and "QGIS", and calculation of spatial and temporal determinants in arboviral infections. Lecturers: Wildo Navegantes, Renato Reis, Isadora de Siqueira, and Maricélia Lima. (Practice)

**Days 6 and 7 – Saturday and Sunday – August 24-25, 2019 – Computer room**  
**(Coordinator: Luiz Alcantara)**

Generation of consensus sequences from MinION raw data. Lecturers: Vagner Fonseca, Álvaro Salgado, Marta Giovanetti, Ingra Morales, Flávia Aburjaile, and Rodrigo Dias de Oliveira Carvalho. (Practice)

**Day 8 – Monday – August 26, 2019 – Computer room**

**08:00-12:00:** Organization and alignment of genomes to reference sequences, and phylogenetic reconstruction: NJ and ML. Lecturers: Marta Giovanetti, Fernanda Nogueira, Luiz Alcantara, Flávia Aburjaile, and Rodrigo Dias de Oliveira Carvalho. (Theory and practice)

**12:00-13:30:** Lunch time.

**13:30-15:10:** Temporal evolutionary analyzes. Lecturers: Tiago Graf, Marta Giovanetti, Darlan Candido, and Jorlan de Jesus. (Theory and practice)

**15:10-15:30:** Coffee Break

**15:30-16:30:** Temporal evolutionary analyzes. Lecturers: Tiago Graf, Marta Giovanetti, Victor Pimentel, Jorlan de Jesus, and Flávia Aburjaile. (Practice)

**16:30-17:30:** “Genome Detective”, Viral Metagenomics and Online Viral Genotyping Tools. Lecturers: Vagner Fonseca, Ingra Morales, Marta Giovanetti, Flávia Aburjaile, and Rodrigo Dias de Oliveira Carvalho. (Theory)

**Day 9 – Tuesday – August 27, 2019 – Computer room**

**08:00-12:00:** Phylogeographic analysis. Lecturers: Tiago Graf, Marta Giovanetti, and Fernanda Nogueira. (Theory and practice)

**12:00-13:30:** Lunch time.

**13:30-15:10:** Phylogeographic analysis. Lecturers: Tiago Graf, Marta Giovanetti, and Fernanda Nogueira. (Theory and practice)

**15:10-15:30:** Coffee Break

**15:30-16:10:** “Genome Detective”, Viral Metagenomics and Online Viral Genotyping Tools. Lecturers: Vagner Fonseca, Ingra Morales, Marta Giovanetti, Flávia Aburjaile, and Rodrigo Dias de Oliveira Carvalho. (Theory)

**16:10-18:00:** Phylogeographic analysis. Lecturers: Tiago Graf, Marta Giovanetti, Darlan Cândido, and Fernanda Nogueira. (Practice)

**Day 10 – Wednesday – August 28, 2019 – Amphitheater**

**08:00-12:00:** Preliminary epidemiological and evolutionary analyzes from the data generated during the course.

**12:00-13:30:** Lunch time.

**13:30-15:10:** Preliminary epidemiological and evolutionary analyzes from the data generated during the course.

**15:10-15:30:** Coffee Break

**15:30-17:00:** Preliminary epidemiological and evolutionary analyzes from the data generated during the course.

**17:00-18:00:** Temporal clinical surveillance of dengue in Bahia and Brazil. Lecturers: Melissa Falcão and Rivaldo Venâncio.

**Day 11 – Thursday – August 29, 2019 – Amphitheater**

**08:00-10:00:** Surveillance of arboviral outbreaks through epidemiological and evolutionary temporal studies: putting the results in the format for a publication. Lecturers: Túlio de Oliveira, Tiago Graf, and Marta Giovanetti. (Theory and practice)

**10:00-12:00:** Surveillance of arboviral outbreaks through epidemiological and evolutionary temporal studies: putting the results in the format for a publication. Lecturers: Túlio de Oliveira, Tiago Graf, and Marta Giovanetti. (Theory and practice)

**12:00-13:30:** Lunch time.

**13:30-15:10:** Preliminary epidemiological and evolutionary analyzes from the data generated during the course.

**15:10-15:30:** Coffee Break

**15:30-18:00:** Preliminary epidemiological and evolutionary analyzes from the data generated during the course.

**Day 12 – Friday – August 30, 2019 – Amphitheater**

**08:00-12:00:** Preliminary epidemiological and evolutionary analyzes from the data generated during the course.

**12:00-13:30:** Lunch time.

**13:30-15:10:** Preliminary epidemiological and evolutionary analyzes from the data generated during the course.

**15:10-15:30:** Coffee Break

**15:30-18:00:** Preliminary epidemiological and evolutionary analyzes from the data generated during the course.
